Hot Tip #30: Survey Says - Cost/Megabit is Decreasing!

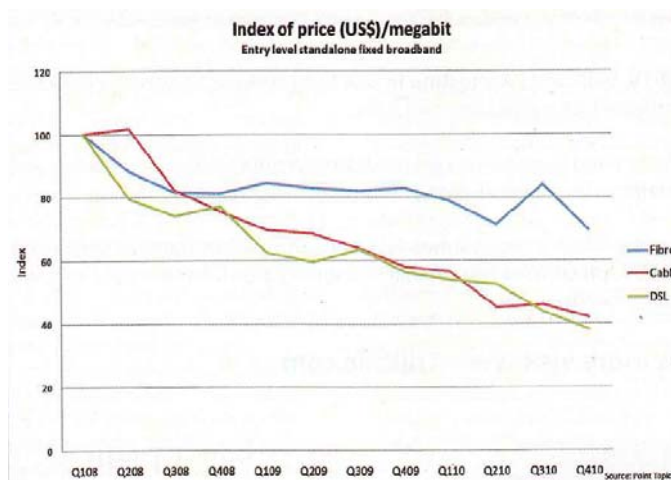

Hesitant about broadband costs - don't be! Upgrade your bandwidth today!

Broadband Costs are Decreasing!!

Has your business evolved to be more and more dependent on the internet, yet you've forgotten to upgrade your access? Take an assessment of how much you and your employees utilize the internet to get their day to day jobs done. I'll bet it is more than you think and not having enough bandwidth is counterproductive to your business! The good news is it is never too late to look into speeding things up...

The costs of high speed, reliable broadband internet connections are on a declining trend. A recent survey shows that the cost per megabit has been on a steady decrease since the beginning of 2008 - now just half the amount. This can be attributed to increased competition as new markets are being found for DSL and fiber. This is great news for small to medium sized business owners who can now, as the research

suggests, afford looking into upgrading their business' internet connection. Whether you are looking to increase your speed from a basic 384K DSL connection to a 1.5M T1 circuit or completely change your internet access to a different type of connection such as fiber, ITS is able to meet all of your bandwidth needs.

Contact an ITS representative today at 800.876.4ITS (4487) to find out more about the types of bandwidth that are available for your business.

Sincerely,

ITS -- Integrated Telemanagement Services, Inc.
