

Local technology company recognized

April 20, 2018

Integrated Telemangement Services Inc. in Simi Valley has been named to CRN's 2018 Managed Service Provider 500 list in the Pioneer 250 category.

This list recognizes North American solution providers that deliver cutting-edge IT services to companies, allowing them to focus on their business, not their technology.

ITS helps companies navigate the complex and changing landscape of IT, providing immediate attention and "white glove" support to client needs.

Since its inception in 1990, ITS has been based in Simi Valley. Although the company originally began as a reseller of telephone services for local businesses, it has evolved along with technology.

ITS now offers local businesses a one-stop shop for all of their communication and technology needs. Visit itstelecom.com for more information.
