Integrated Telemangement Services Inc., which employs 21 people in Simi Valley, was recently recognized as one of the top managed service providers in the world.

The company once again earned a coveted spot on Channel Futures' MSP 501, a list of the 501 top managed service providers across the globe. This is the third year in a row the Simi company has made the list, ITS said in a statement.

Managed service providers are third-party companies that manage information technology infrastructure and computers for small- and medium-sized businesses.

ITS partners with businesses in Central and Southern California, managing phones, computers, servers, network, internet and cybersecurity.

"Most of our team has been educated and trained within Ventura County and the San Fernando Valley," said Sharon Woods, president and CEO of ITS.

ITS is a female-owned business and has been headquartered in Simi Valley for over 32 years, partnering with more than 400 companies.

The business is also ranked among the top IT companies worldwide by Computer Reseller News.

ITS is located at 4100 Guardian St., Ste. 110, Simi Valley. For details, go to itstelecom.com.
