## ITS – Integrated Telemangement Services, Inc. Joins AT&T Partner Exchange as Platinum Solution Provider

**Simi Valley, California – November 4, 2013** ITS – Integrated Telemangement Services, Inc., has joined the AT&T\* Partner Exchange<sup>SM</sup> reseller program as a Platinum Solution Provider and is now authorized to resell services from one of the leading worldwide providers of IP-based communications services to businesses. Bundling AT&T solutions with ITS solutions will provide innovative, customized choices for customers.

Sharon Woods, President and CEO said “ITS is very excited with the opportunity to join the AT&T Partner Exchange as a Platinum Solution Provider and to add the AT&T services to our overall product offering. These new products not only complement our existing solution offering, but allow ITS to expand our uniquely innovative and customized solutions that our customers have come to depend on us to provide them.”

“We welcome ITS to the AT&T Partner Exchange. Our collaboration will enable ITS experts to bundle our innovative services with their in-depth knowledge to deliver tailor-made solutions to businesses,” said Randall Porter, Vice President, Sales and Business Development, Emerging Business Markets, AT&T Business Solutions.

ITS will initially resell the following solutions with additional solutions to be added this year.

- [AT&T Managed Internet Service](#) - high-speed dedicated Internet access, with the features businesses need to connect with customers, partners, and employees.
- [AT&T Virtual Private Network Service](#) - provides the foundation that connects the main office, data centers, branch offices, and remote and mobile workers to each other, and to the applications they need to be productive.
- [AT&T Multiprotocol Label Switching \(MPLS\) Private Network Transport](#) - businesses can couple their AT&T Managed Internet Service with a point-to-point, network-based connection for increased security and availability.
- [AT&T IP Flexible Reach](#) - a managed Voice over IP communication solution that supports inbound and outbound calling on your data network, providing local, long distance, and international calling for U.S. sites.

- [AT&T Network-Based IP VPN Remote Access \(ANIRA\)](#) - provides highly-secure access to critical business applications regardless of location, access type or device across the AT&T Global Network.
- [AT&T Synaptic Compute as a Service<sup>SM</sup>](#) - offers on-demand virtual machines and associated networking resources in a self-service, pay-as-you-go model.
- [AT&T Synaptic Storage as a Service<sup>SM</sup>](#) - provides highly-secure, virtualized storage that adaptively scales to any size your customers need, and is accessible from virtually any device, nearly anywhere.
- [AT&T Platform as a Service](#)- a complete development environment that allows users to build custom applications and bring them online quickly and efficiently.

*\*AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand and not by AT&T Inc.*
